### Key trends in macro and business environment

Growth patterns across key economies exhibiting divergence -The US is slowing, Eurozone is recovering, China is battling headwinds

The ongoing economic uncertainty has prompted a cautious stance on discretionary spending by global clients

Global banks continue to focus on operational efficiencies, regulatory compliance and business transformation. Sustained activity in private capital

Growing impetus on captives by global institutions

Increased volatility due to macro uncertainties leading to greater client need for benchmarking solutions to target opportunities and efficiencies

Continued advancement of emerging technologies such as Gen AI

India's GDP growth to moderate to 6.8% this fiscal due to high interest rates and fiscal consolidation

Bank credit growth continued a steady path supported by the retail and services sectors. Bond issuances witnessed growth on-year during the quarter, on a low base of the previous year

Healthy corporate balance sheets, robust banking system, government's capex focus and broad-basing of private investments will be supportive of domestic activity

Medium-term growth trend expected to remain healthy, largely fueled by capital and efficiency
